(54) NETWORK PRINT SYSTEM, INFORMATION PROCESSOR AND CONTROL METHOD THEREFOR

(57)Abstract:

PROBLEM TO BE SOLVED: To print the image data of a slip prepared by using a web browser with high quality.

SOLUTION: A slip is displayed by a web browser 114 of a client 101, and when the printing is instructed, the instruction is transmitted to a server 106. Then, a proper template is retrieved from a slip template storing part 108, and composed with data by an image generating part 111, and converted into PDL(page description language), and printed from a printer 113 with high quality.

LEGAL STATUS

[Date of request for examination]

[Date of sending the examiner's decision of rejection]

[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]

[Date of final disposal for application]
